

Environmentally-friendly Value Chain

PDIC has policies in place safeguarding the environment such as the guidelines on waste segregation and management of hazardous waste. Specifically, the SOGI on Janitorial and Allied Services has a provision on the waste segregation in compliance with the Solid Waste Management Act and Makati City Ordinance on waste management. PDIC has likewise issued policies on energy conservation and implemented a fuel conservation program.

PDIC and the recognized employees' organization, PHILDICEO, are currently implementing a Collective Negotiation Agreement (CNA) which encourages employees and management to collaboratively take an active role in adopting austerity measures through recycling, prudent use of resources and utilities, and development of streamlined and cost-effective processes.

In 2021, the following initiatives were undertaken at the PDIC Headquarters along Chino Roces Avenue to implement the environmentally-friendly value chain policies of the Corporation:

1. Use of inverter type air conditioning units
2. Use of aerosol type fire suppression units
3. Use of ABC and HCFC type fire extinguishers
4. Use of organic fertilizers for the outdoor and indoor ornamental plants (to enhance the indoor air quality)
5. Use of LED and CFL for the lighting fixtures
6. Use of FDA approved cleaning chemicals
7. Use of FPA approved pest control chemicals
8. Use of GRP (glass reinforced polycarbonate) water tank to mitigate impact of UV rays
9. Noise and pollution control devices installed on the 500kcv and 125kva generator sets
10. Use of euro4 fuel and conduct of planned PMS to ensure all motor vehicles comply with the smoke emission standards (ongoing re-fleeting of motor vehicles more than 10 years old simultaneous with the acquisition of motor vehicles that are euro4 fuel compliant)
